

Galvanized Fixed knot Deer Fence farm and ranch fence

Product Description:

Field Fence, Cattle Fence, Deer Fence, Game Fence

The hinge jointed cattle fence is the strongest, longest lasting and most adaptable fencing available today.

It is usually built using pressure treated steel posts with T/Y type.

The most common general livestock fence is an iron/steel wire with high tensile fence. It is used for dairy and beef cattle pasture with low stocking levels.

With the different height, the fences are used for difficult to control livestock such as sheep or horses and a higher stocking levels such as cattle feed yard.

With extra two or three high tensile barbed wires that for added visibility and safety
